MOQ:1X20HQ4000m² 1000 square meters per colour at least

CASTELLATED WALL PANEL

hollow grille panel, texture design, simple atmosphere, paint-free installation, can be moved in after installation, Waterproof and moisture-proof, not easy to mold, traditional decoration mold, falling off and cracking and other problems are convenient and worry-free.

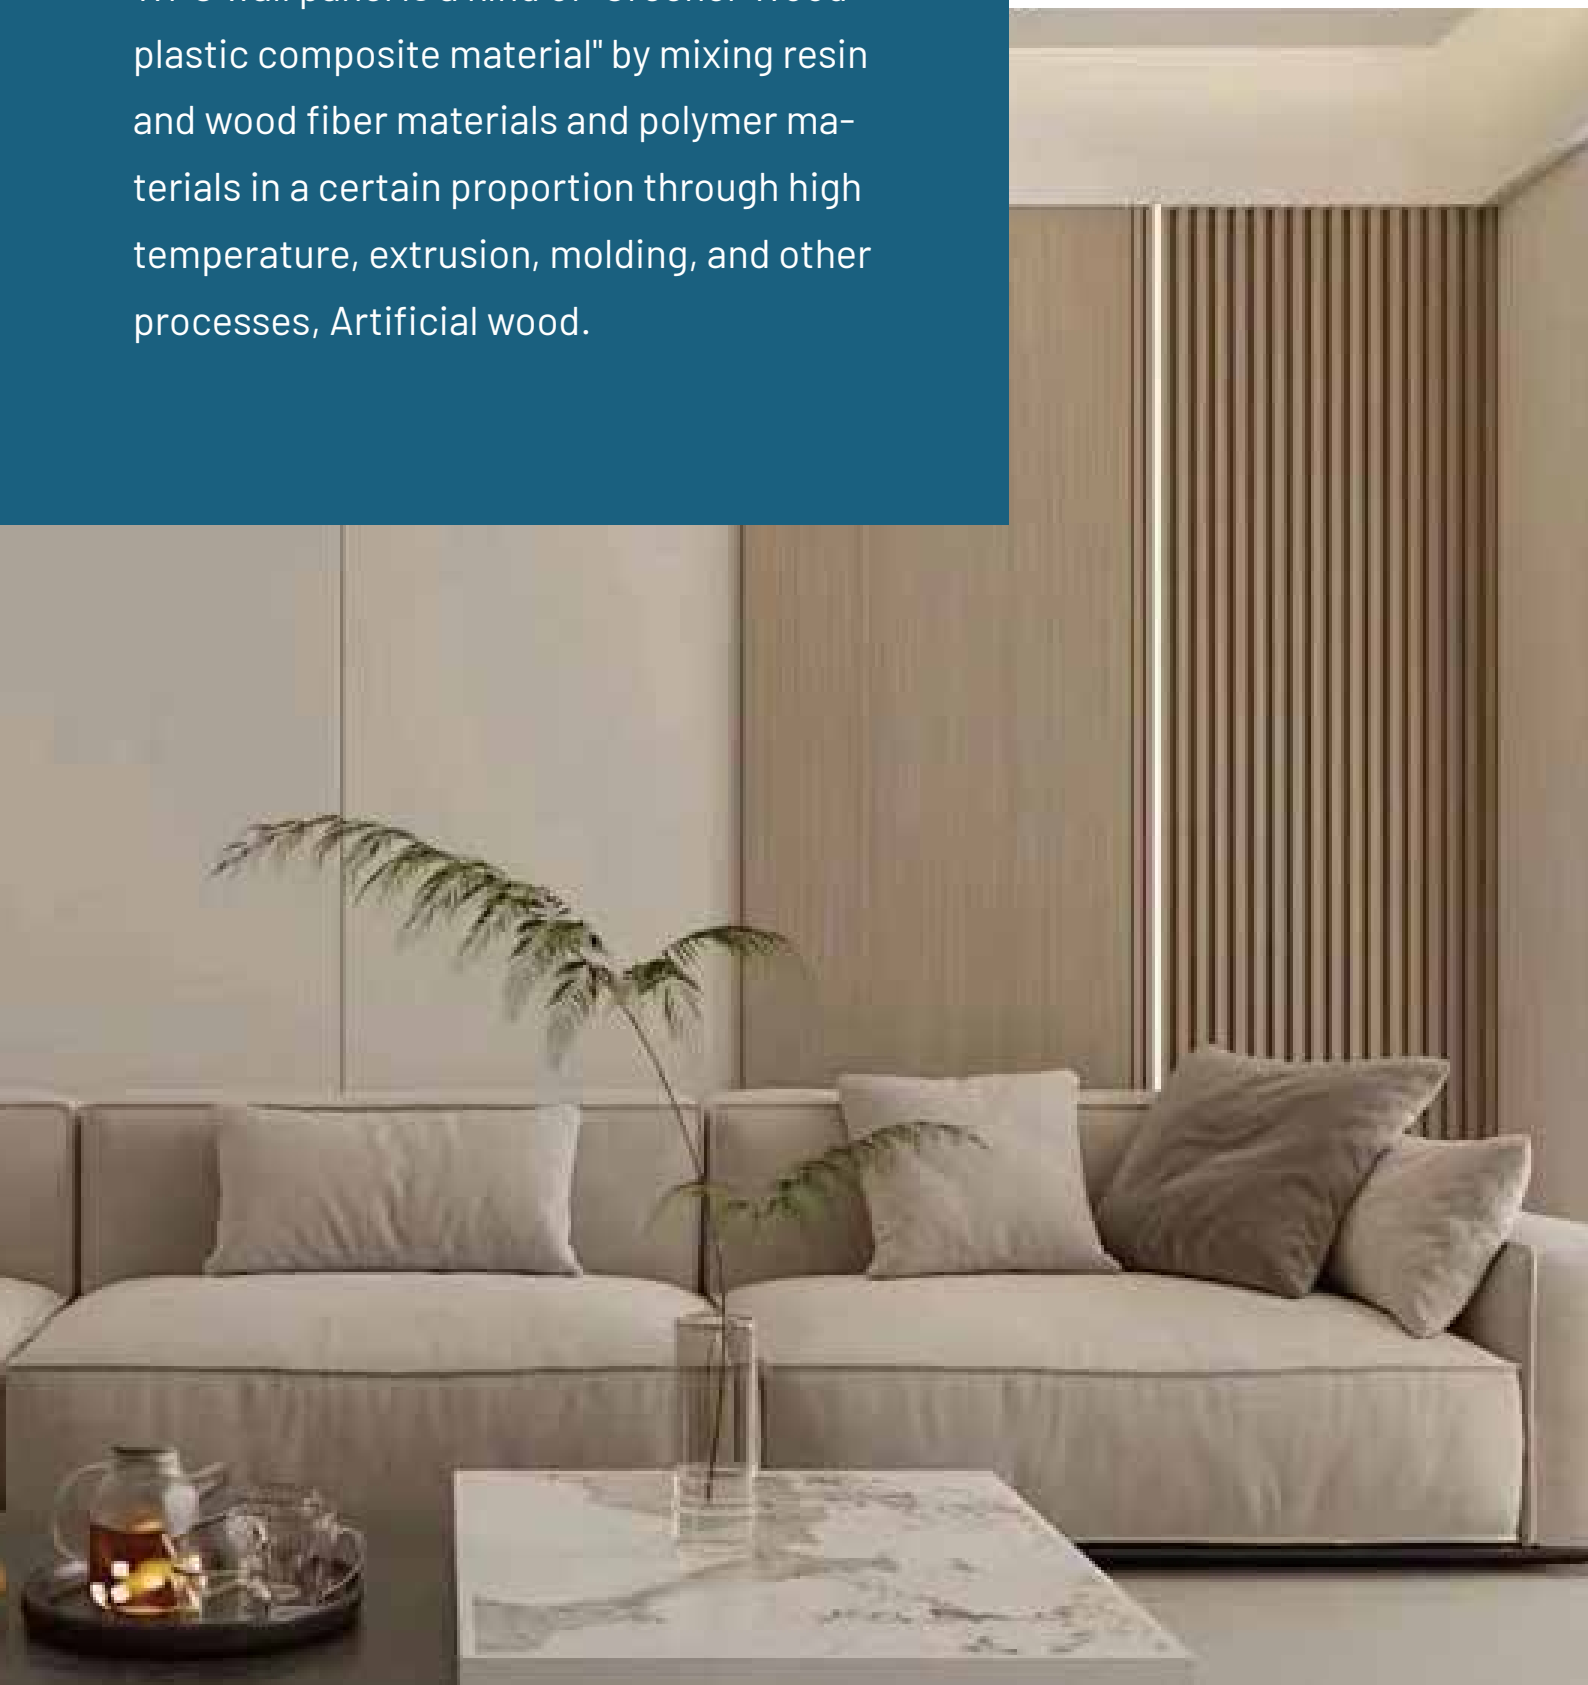

- ✓ Fireproof and flame-retardant, safe to use;
- ✓ Derived from solid wood, better than solid wood;
- ✓ Tough texture, not easy to deform or crack.

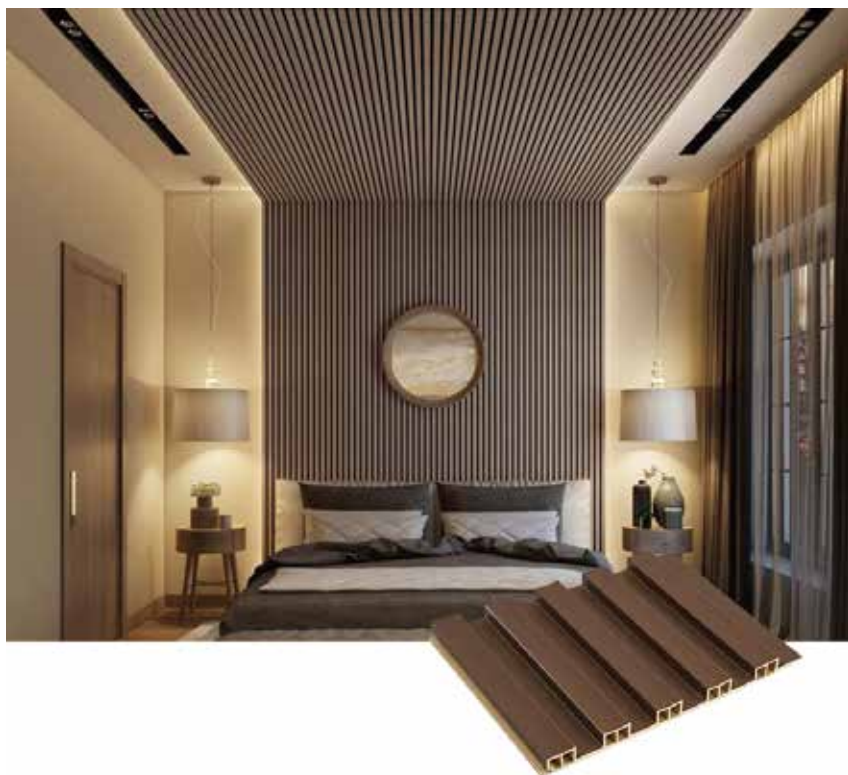

WPC WALL PANEL

WPC wall panel is a kind of "Greener Wood plastic composite material" by mixing resin and wood fiber materials and polymer materials in a certain proportion through high temperature, extrusion, molding, and other processes, Artificial wood.

Indoor WPC Wall Panel

Indoor WPC Wall Panel Information (Customization supported)

Length	2.9-3m
Width	155-200mm
Thickness	15-24mm
surface treatment	Embossing/steel brush aging, etc
MOQ	500 pieces

Outdoor WPC wall panel

WPC is the English abbreviation for wood-plastic composite. Outdoor WPC wall panels are a type of novel environmentally friendly building material primarily made from wood fibers, plant fibers (such as rice husks, bamboo powder), and thermoplastics (such as PE, PP, PVC), along with some processing aids. These components are formed through high-temperature melting and extrusion molding.

Outdoor WPC Wall Panel Information (Customization supported)

Length	2440-4000mm+
Width	20-200mm
Thickness	18-25mm
surface treatment	glossy/polish/fluffing/wire drawing/embossing
MOQ	200m ²

PS WALL PANELS

The core substrate of PS wallboard is PS (Polystyrene), which generally refers to EPS (Expanded Polystyrene, molded polystyrene foam) or XPS (Extruded Polystyrene, extruded polystyrene foam). This is a kind of foam plastic plate which is made by extrusion or molding process and filled with a closed cavity structure inside.

- Thermal Insulation
- Moisture Resistance
- Compression Resistance

Multiple color options

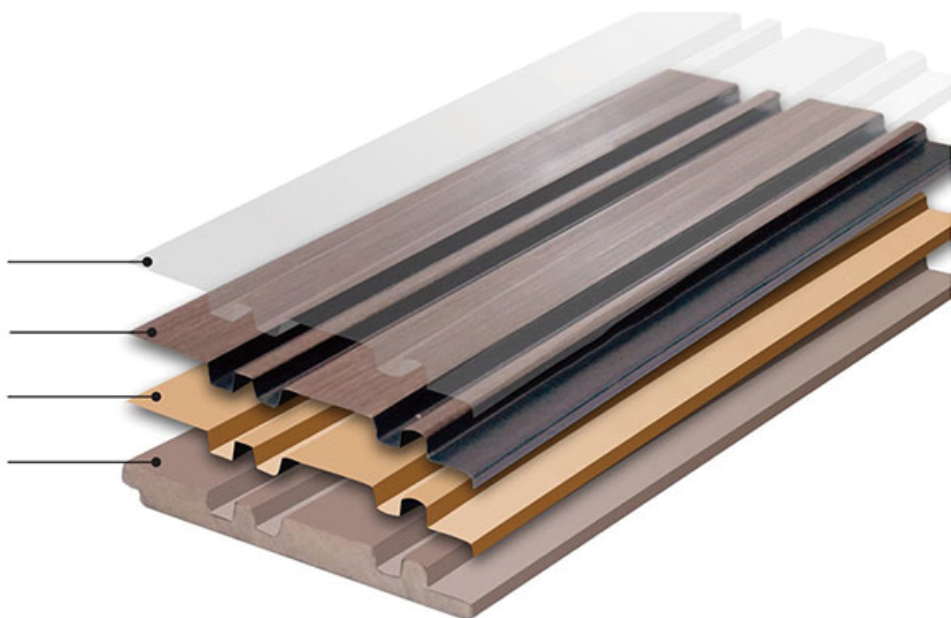

Protective Film Layer

Adhesive

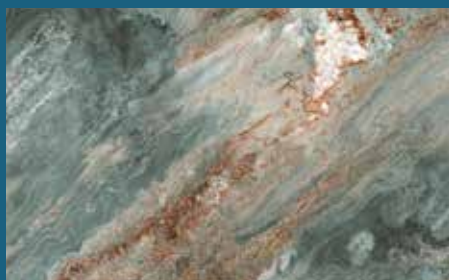

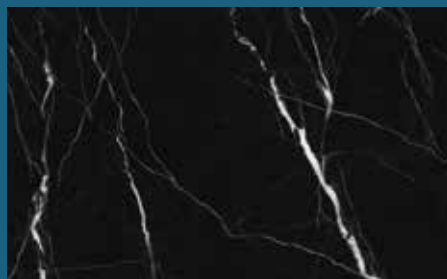

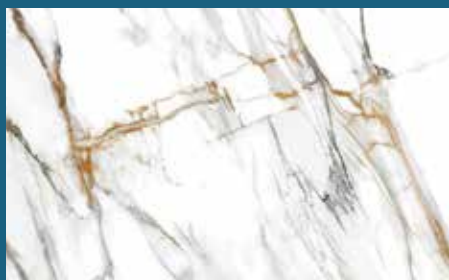

PS Plastic Base Layer

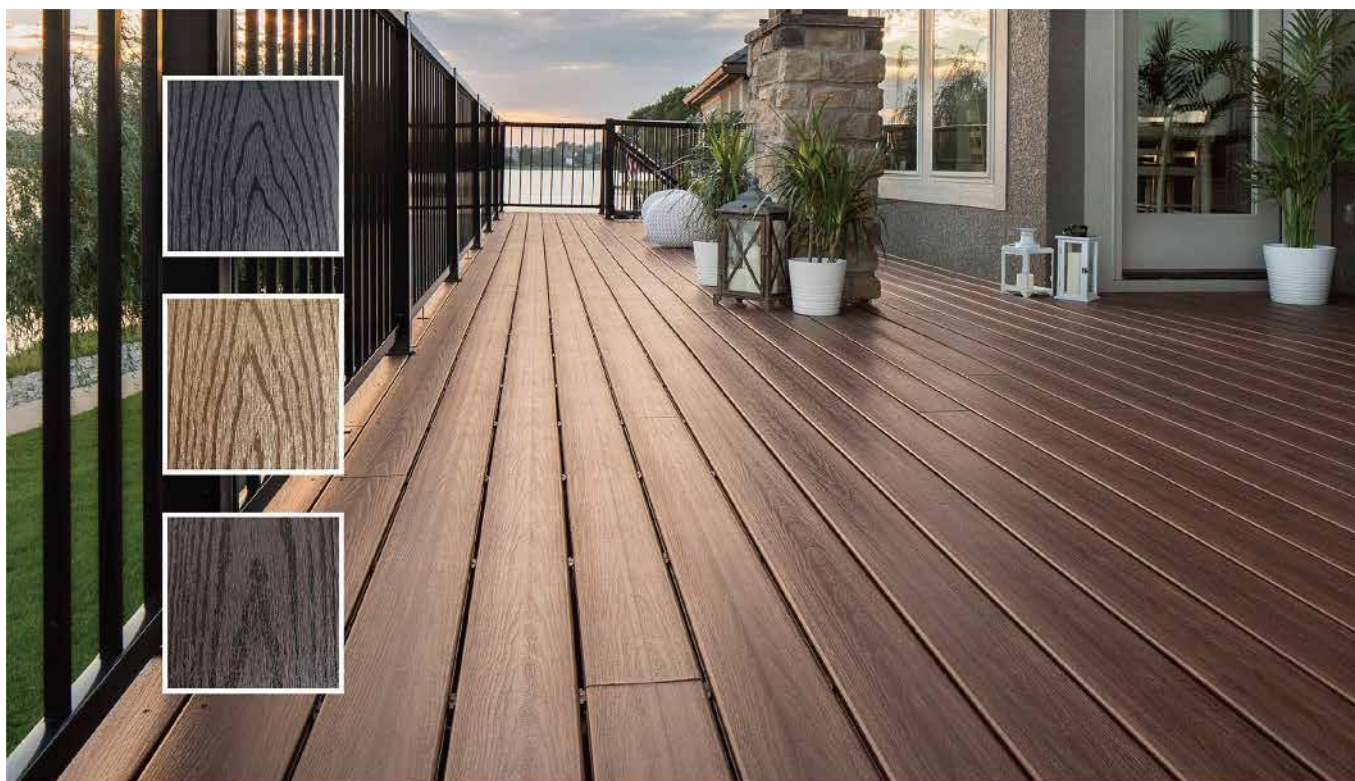

UV PVC MARBLE SHEET

UV PVC marble sheet is a new type of composite decorative materials, PVC as a substrate, the surface is covered with realistic marble texture decorative layer, and through the UV light curing process to form a high hardness, high gloss protective film.

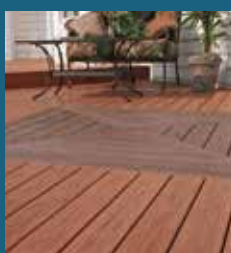

WPC DECKING

It is a new type of outdoor building material that perfectly combines the natural texture of wood with the durable characteristics of plastic. It is mainly made of recycled wood powder and plastic (e.g. PE, PP) composite.

Whether it's a balcony, terrace, garden or poolside, it provides a beautiful, durable and low-maintenance outdoor flooring solution that is ideal for modern outdoor spaces.

3D MDF WALL PANEL

3D MDF wall panel is a kind of three-dimensional decorative material with MDF as the base material, forming various exquisite three-dimensional patterns and textures through CNC engraving technology. It not only has the characteristics of environmental protection, moisture-proof and easy to install,

but also can create a rich sense of spatial hierarchy and artistic atmosphere through the change of light and shadow, which is suitable for background wall, commercial space and other interior decoration, adding a unique visual charm to the modern home and commercial environment.

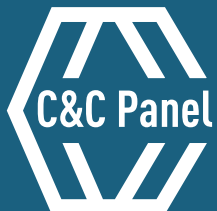

Eco-friendly

Moisture-resistant

Easy-to-install

Creates spatial layering
